

Healthy Spaces Start with a Clean Desk

CleanDesk is a workspace disinfection practice for EnhancedClean™

Personal items and work materials can impede or compromise disinfection of workspaces. Our CleanDesk protocol keeps the disinfection process clear and efficient.

CleanDesk for Reentry

Upon your approval, our technicians prepare each workspace for reentry disinfection:

1. Clear the workspace desk of items
2. Carefully box the items
3. Seal, label, and store the box

The items from every workspace are left for the user to retrieve per your reentry plan.

CleanDesk Steps Going Forward

For effective cleaning and disinfection, we'll set our teams to your preferred protocol:

- Clear the workspace before disinfection
- Leave items with note that desk disinfection was skipped

Cleared items are placed in the bin to avoid compromising disinfection. If the workspace is not cleared, a reminder of your chosen CleanDesk policy is left for the workspace user.
